

Student BYOx Checkist (2016.1)

Stuff to do before you get your computer to school

Step to Take	Information	Who needs to do this	
1. Students should have a Laptop or Tablet computer running Windows with 4 Gb RAM.	Windows 8, 8.1 or 10 Fine (<i>Even Windows 7</i>) <i>for Mac Computers see notes below</i>	Mum & Dad	
2. Check your email at http://owa.eq.edu.au Run the Prepare_4_BYO program you have been emailed.	You'll need to know your username and password An email was sent in Nov 2015. This program helps you with Steps A-C	Student or Mum & Dad	
a. The ComputerName should be their MIS Logon Name e.g. FSMIT8	This should be done at home <i>Manual instructions are on the website School website</i>	Mum & Dad	
b. The Windows Username should be Surname_Firstname e.g. Smith_Fred When you are at school you must only use this user account. This should be a "Local" account.	This should be done at home <i>Manual instructions are on the website School website</i> http://cairnsshs.eq.edu.au	Mum & Dad Do not rename an existing account... Create a New Account Do NOT create a "Microsoft Account"	
c. Install MS Office Student Advantage (This is FREE to all students)	Instructions are also on the school website 1st Page asks for email address 2nd page asks for logon ID	Student	
3. The Student BYOx Charter should be signed and returned and the box ticked in the database.	Return form to Text Book Hire	Student and Mum & Dad	
4. The BYOx network connection fee should be paid in full and ticked in the database.	The fee can be paid at the Front Office	Student or Mum & Dad	
5. If the database has both ticks, students are emailed a program called BYOSetup and instructions for connecting to the WiFi and school drives.	Check with Text Book Hire or Computer Technicians. This program should be run (installed) at home	Student Webmail location http://owa.eq.edu.au	

Notes:

- We do NOT want you to set up a **Microsoft Live Account** logon to windows, this is not helpful. We need a **Local account** in the form of Surname_Firstname
- Mac computers 1. You *NEED to buy Windows!!!* and 2. You have to install Windows using BootCamp (to do this you will need to be familiar with both Mac BootCamp and Windows... YouTube contains many video tutorials).
Mac computers are NOT a good idea. Some students think they are a fashion statement. This is NOT a good reason for buying one. Please think twice before purchasing a Mac for BYOx at Cairns High.

Stuff to do at school

At beginning of term (or after a password Change)

<p>6. Connect your WiFi to either iDET or QDETA-X (some computers prefer one, some prefer the other.... taste and see)</p>	<p>For a faster connection try using FNQ\ to precede the username e.g. FNQ\ghump22</p>	<p>Student</p>
--	---	----------------

Each day at school

<p>7. Run (double click) the BYO Logon icon every day to map their drives....</p> 	<p>This is done each day in the classroom</p>	<p>Student</p>
<p>It look like this...</p> <p>The logon script will</p> <ul style="list-style-type: none"> • Self-update • Install AB Tutor control client. • Check for you Anti-Virus software being up-to-date • Record the logon in a database • Map S: Drive • Map H: (You will save in your My Documents by default, but you can access the 200Mb on H: if you need... e.g. Graphics) 		<p>A Smiley face indicates that the WiFi is Connected.</p> <p>A straight face indicates, the WiFi is visible but not connected.</p> <p>A red cross indicates this school WiFi access point is not seen. If both are not seen, perhaps your WiFi is switched off?</p>
<p>8. If your password has expired, then you may have to click on the ReDo WiFi button. This has the effect of flushing your previously saved WiFi connection password (thus causing your computer to ask for it again).</p>	<p>If your teacher resets your password, you will almost definitely need to click on the ReDo WiFi button. If Windows prompts you to reset your own password, you might not need to do this.</p>	<p>Student</p>
